

Dear Industry Partner,

Baker Wine & Grape Analysis is proud to announce that we are now an accredited lab through the [American Association for Laboratory Accreditation](#) (A2LA) for the International Standard ISO/IEC 17025:2017.

Why did we choose to certify at ISO/IEC 17025:2017 standards?

BWGA seeks to meet the highest standards and maintain credibility in testing by following requirements in consistent operations, accuracy, reliability and competency of our lab and chemists. ISO/IEC17025:2017 is the international standard setting benchmarks recognized globally. Our accreditation makes it easy for our customers to comply with corporate requirements and is beneficial for export analysis.

Why did we choose A2LA?

A2LA's agreement with International Laboratory Accreditation Cooperation (ILAC) accreditation is accepted throughout many countries, is one of the largest accreditation bodies in the world and is recognized as the gold standard in our industry. We are very excited about this additional stamp of approval on the services we provide. Our accreditation includes over 90 tests relating to chemical analysis on wine, juice, olive oil, beer, spirits, cider, sake, kombucha, vinegar, and hydrogen peroxide along with sensory and microbial testing on juice & wine!

What are the accreditation parameters?

We are assessed and accredited on the following:

- Equipment calibration
- Quality assurance processes and results
- Safe and secure handling of samples and results
- Staff capability and technical proficiency
- Suitability of testing methods
- Working environment

Proof of our accreditation can be found [here](#)-- type in the keyword "wine" and you'll find us at the top of the list.

Thank you for trusting Baker Wine & Grape Analysis to provide your accredited laboratory analyses and for supporting a locally owned and operated company!
